GOVEDARSTVO

MESEČNI

Novogodišnji i verski praznici, loši vremenski uslovi tokom januara i otežan transport grla uslovili su slabiju ponudu goveda na većini stočnih pijaca u Srbiji. Obim prometa teladi, tovne junadi i krava za klanje obe rase bio je takođe dosta slab.

Telad telesne mase do 160 kilograma SM rase, su se proteklog meseca mogla pazariti na dvanaest stočnih pijaca. Najniža dominantna cena evidentirana je u Čačku i Požarevcu i iznosila je 250 din/kg. Najviša, a ujedno i dominantna cena ove kategorije goveda zabeležena u Pančevu, Nišu i Obrenovcu i iznosila je 300 din/kg. Najčešća prodajna cena teladi HF rase je proteklog meseca iznosila 250 din/kg.

Ponuda i tražnja tovnje junadi do 300 kilograma telesne mase SM rase bila je dosta slaba, a dominirala je cena od 155 din/kg. Ponuda i prodaja grla HF rase zabeležena je samo na dve sočne pijace, a cena je varirala od 130 do 140 din/kg.

U kategoriji tovnje junadi preko 480 kilograma je najniža prodajna cena od 140 din/kg postignuta je u Kikindi dok je najviša evidentirana u Pirotu i iznosila je 165 din/kg, ali je dominirao iznos od 150 din/kg.

Prodaja krava za klanje HF rase se tokom proteklog meseca odvijala na tri

stočne pijace po dominantnoj ceni od 90 din/kg. Kvalitetna grla krava zaklanje SM rase mogla su se pazariti na dvanaest stočnih pijaca po najčešćoj ceni od 100 din/kg.

NEDELJNI

Prodajna cena tovnje junadi na pijaci u Obrenovcu bila je viša za 10 din/kg, a razlog je slabija ponuda. Krava za klanje nije bilo za prodaju, dok je cena teladi bila nešto niža u poređenju sa predhodnim periodom.

Protekle nedelje je zabeležena dobra ponuda junadi SM rase i krava za klanje na pijaci u Pančevu i klanicama južno-banatskog regiona.

Na stočnoj pijaci u Vranju cene goveda su mirovale, iako je ponuda bila veoma slaba, pre svega zbog niskih temperatura, a i zbog evidentno sve manjeg broja goveda u ovom kraju. Osetno je veliko nezadovoljstvo farmera zbog stanja u agraru i njihovog sve težeg položaja na tržištu. Otkupljivači se ponašaju ucenjivački pa je i dalje veliki problem naplate prodate stoke klanicama i mesarama, što dodatno otežava ionako težak položaj odgajivača. Klaničari su, usled slabije potražnje snizili otkupne cene junica, gde je cena niža za 5 din/kg.

MESEČNI

Po obimu ponude svinja januar se značajno razlikovao u odnosu na decembar. Naime, broj prasadi koji se prodavao na pijacama u Srbiji bio je uglavnom na prošlomesečnom nivou, ali je značajno opao obim ponude i tražnje tovnih svinja kako grla telesne mase od 80 do 130 kilograma tako i grla preko 130 kilograma i krmača za klanje.

Prodajna cena prasadi kod grla do 15 kilograma je u januaru zavisnosti od obima potražnje i kvaliteta grla varirala od 190 do 220 din/kg. U kategoriji prasadi do 25 kilograma telesne minimalna cena je iznosila 180, a maksimalna 220 din/kg, ali je ipak dominirao iznos od 180 din/kg na većini pijaca žive stoke.

Slabiji obim ponude i otkupa tovnih svinja obe kategorije zabeležen je u januaru u odnosu na predhodna dva meseca kako na stočnim pijacama tako i klanicama u Srbiji. Prodajna cena tovnih svinja varirala je u zavisnosti od kategorije, rase i kvaliteta grla. Dominantna cena grla telesne mase od 80 do 130 kilograma iznosila je 130 din/kg, dok su se grla preko 130 kilograma najčešće mogla pazariti po ceni od 120 din/kg.

Proteklog meseca opao je broj grla za prodaju u kategoriji krmača za klanje. Promet je takođe bio dosta slabiji u odnosu na predhodna dva meseca. Što se cene tiče, dominirao je iznos od 100 din/kg.

NEDELJNI

Protekle sedmice klaničari iz Vranja i ostalih mesta pčinjskog okruga su, usled slabije potražnje, snizili otkupne cene nekih kategorija svinja. To se pre svega odnosi na tovljenike I klase telesne mase od 80-130 kg, kao i tovljenika preko 130 kilograma težine. Otkupna cena ovih kategorija bila je niža za 10 din/kg u odnosu na predhodni period.

Cene svinja u Zrenjaninu i okolnim mestima srednje-banatskog okruga bile su uglavnom u padu u odnosu na predhodnu sedmicu, a razlog je pad obima tražnje tovljenika. Uglavnom se vršio otkup sa većih farmi zbog sigurnosti klaničara u kvalitativna svojstva otkupljenih grla.

Ponuda svinja u Loznici je protekle sedmice bila dosta slaba. Zabeležen je pad otkupne cene tovljenika obe kategorije. Nešto veću cenu su klaničari plaćali jedino za grla ekstra kvaliteta ali je njih bilo veoma malo.

Primetna je bio pad cene tovnih svinja i krmača za klanje na stočnoj pijaci u Sremskoj Mitrovici.

Na pijaci žive stoke u Obrenovcu je prasad do 15 kg bila jeftinija u proseku za 10 din/kg, a ponuda obe kategorije prasadi veoma slaba. Tovne svinje su se uglavnom prodavale po cenama nižim u proseku za 5 din/kg u poređenju sa predhodnim periodom.

OVČARSTVO**MESEČNI**

Sezona jagnjenja i praznici u toku proteklog meseca uslovili su dosta dobru ponudu jagnjadi na većini stočnih pijaca u Srbiji. Obim ponude ostalih kategorija ovaca zadržao se na prošlomesečnom nivou. Nastavljen je trend slabe ponude jaradi i koza.

Prodajna cena jagnjadi varirala je od 200 do 250 din/kg, ali je ipak najčešći iznos po kojoj su se mogla pazariti grla ove kategorije ovaca iznosila 230 din/kg.

Dominantna cena po kojoj su se mogla pazariti dviske iznosila je 150 din/kg. U januaru je evidentiran porast obima tražnje u kategoriji šilježadi, a najčešća prodajna cena iznosila je 160 din/kg.

Povećan obim prometa zabeležen je i kod ovaca proteklog meseca. Prodaja se obavljala na šesnaest stočnih pijaca u Srbiji, a dominirala je cena od 120 din/kg. Najčešća prodajna cena ovnova za priplod

varirala je u zavisnosti od kvaliteta grla i obima prodaje od 120 do 150 din/kg.

Prodaja jaradi i koza bila je dosta slaba proteklog meseca. Najčešća cena po kojoj su se mogla pazariti jarad iznosila je 180 din/kg, dok je dominantna cena koza bila 100 din/kg.

NEDELJNI

Prodajne cene jagnjadi, šilježadi, dviski nisu se značajnije menjale u odnosu na predhodnu sedmicu na pijaci žive stoke u Obrenovcu. Dominantna cena ovaca i ovnova niža za 10 din/kg.

Na pijaci žive stoke u Kraljevu ponuda ovaca i koza bila je jako slaba zbog hladnog vremena. Zabeležen pad dominantne cene jagnjadi u odnosu na predhodnu sedmicu.

Protekle sedmice je na stočnoj pijaci u Sremske Mitrovici evidentiran pad cene jagnjadi, dok je dominantna cena ovnova za priplod bila u porastu.

Cene žitarica i stočne hrane

Niske temperature i loše vremenske prilike tokom januara uticale su na slabiji obim ponude i tražnje žitarica i ostalih stočnih hraniva na pijacama u Srbiji. Ponuda komponenti za pripremu stočne hrane i žitarica u silosima i poljoprivrednim apotekama bila je na prošlomesečnom nivou.

Cena kukuruza upakovanog u džakove varirala je od 10 do 14 din/kg, ali je dominirao iznos od 12 din/kg.

Kukuruz u zrnju se u rinfuznom obliku najčešće mogao pazariti od 10 do 11 dinara za kilogram što pokazuje da nije došlo do značajnijih promena u odnosu na predhodni period.

U toku januara se pšenica pakovana u džakove prodavala po dominantnoj ceni od 12 din/kg, a ponuda i tražnja bila je slaba.

Najčešća prodajna cena ove žitarice u silosima je iznosila je 11 din/kg, a promet je bio nešto bolji u odnosu na decembar.

Stočni ječam upakovanog u džakove se mogao pazariti na sedam prodajnih mesta, a dominantna cena proteklog meseca iznosila je 14 din/kg, što ukazuje na trend rasta cene ove žitarice značajne za spravljenje stočnih hraniva. Ponuda je bila nešto slabija nego predhodnog meseca.

Prodajna cena stočnog brašna varirala je od 9 do 10 din/kg, ali je ipak dominirao iznos od 10 din/kg tokom čitavog meseca.

Dosta slaba ponuda lucerkinog sena na gazdinstvima i pijacama širom Srbije, a najčešće se moglo pazariti po ceni od 10 din/kg. Kvalitet ovog stočnog hraniva bio je dosta dobar.

Ponuda i obim tražnje lucerkinog brašna zadržali su novo iz predhodnog perioda, a cena ovog stočnog hraniva varirala je najčešće od 28 do 32 din/kg.

Dominantna maloprodajna cena sojine sačme iznosila je 60 din/kg, a ponuda i tražnja je bila uobičajena.

AGROINFO VESTI

U Srbiji je juče počela registracija i obnova registracija poljoprivrednih gazdinstava koja će trajati do 31. marta i koja će biti pojednostavljena, izjavio je pomoćnik ministra poljoprivrede Milan Stegić. "Registrovana poljoprivredna gazdinstva će od 2010. prijavljivati samo grupe poljoprivrednih kultura koje sade ili seju, da bi od 2011. obnavljali registracije samo ukoliko ima nekih promena", kazao je on. Govoreći o registraciji stočnog fonda, Stegić je naveo da će se u Registar poljoprivrednih gazdinstava upisivati samo HID broj (identifikacioni broj farme) i kategorije stoke koje se nalaze na farmi. "Svi ostali podaci koji će biti neophodni za ostvarivanje prava na subvencije, kao što su vrsta stoke, broj stočnog fonda i slično, Uprava za agrarna plaćanja, kao organ u sastavu Ministarstva poljoprivrede, će proveravati po službenoj dužnosti u Centralnoj bazi koju vodi Uprava za veterinu", rekao je Stegić. Ministarstvo poljoprivrede je da od 2005. uspostavilo registar, kako bi se prikupili svi relevantni podaci o poljoprivrednim gazdinstvima koji se koriste za planiranje mera u oblasti poljoprivrede, lakšu komunikaciju sa poljoprivrednicima i podaci na osnovu kojih poljoprivrednik ostvaruje pravo na subvencije. "Zbog toga je od ključne važnosti za poljoprivredna gazdinstva da prijave tačne podatke u Registar poljoprivrednih gazdinstava, jer u suprotnom mogu izgubiti pravo na pojedine subvencije", istakao je Stegić.

**Promet robe na produktnoj berzi u Novom Sadu
od 25. do 29. januara 2010. godine**

Poslednja nedelja januara donosi:

- prepolovljen promet
- blagi pad cene kukuruza
- solidan promet pšenice
- dalji pad cena pšenice i kukuruza na svetskim i evropskim berzama

Od početka prodaje regresiranog mineralnog đubriva koja je startovala 31.12.2009. pa zaključno sa 28.01.2010. zaključena je kupoprodaja 226.735 tona, od čega se 120.810 tona odnosi na amonijum nitrat, 70.720 tona na ureu, a 35.205 tona na KAN.

Najvažnija vest iz protekle nedelje je više nego prepolovljen promet, koji je pre svega uzrokovan padom prometa kukuruzom.

Sve je jasnije da kupoprodaja kukuruza diktira promet na Produktnoj berzi, što se potpuno obistinilo u protekloj nedelji. Naime prometovano je svega 825 tona, uz zaključenu cenu koja se kretala od 11,20-11,40 din/kg uz jasan silazni trend. Konstatacija iz prethodnog izveštaja o „tesnoj“ izвозnoj kalkulaciji je dobila svoju potvrdu na samom kraju nedelje kada je zaključena cena od 11,20 din/kg. Ponderisana ovonedeljna cena iznosi 11,35 din/kg, što je u odnosu na prethodnu nedelju rast od 2,53% zahvaljujući kupoprodajama s početka nedelje.

Promet pšenice je iznosio 145 tona, uz dva kupoprodajna ugovora. Cena se kretala od 11,30-11,50 din/kg, bez jasno izraženog trenda. Ponderisana ovonedeljna cena iznosi 11,46 din/kg, što je rast od 1,15% u odnosu na prethodnu nedelju. Slobodno se može konstatovati da pšenica već duže vremena nema izražen cenovni trend.

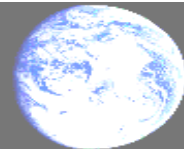

Uz pšenicu i kukuruz, prometovano je još samo azotnim đubrivom i to ureom po ceni od 21,85 din/kg u količini od 50 tona (rast cene od 6,59%), kao i amonijum nitratom u količini od 72 tone, a po ceni od 15,75 din/kg (rast cene od 3,62%).

Na strani ponude izdvajamo jedino suncokretovu sačmu (15,50 din/kg).

Ukupan količinski ovonedeljni promet iznosi 1.142 tone, što je pad od 56,95% a vrednosni 14.929.370,00 dinara, što je pad od 55,26% u odnosu na prethodnu nedelju.

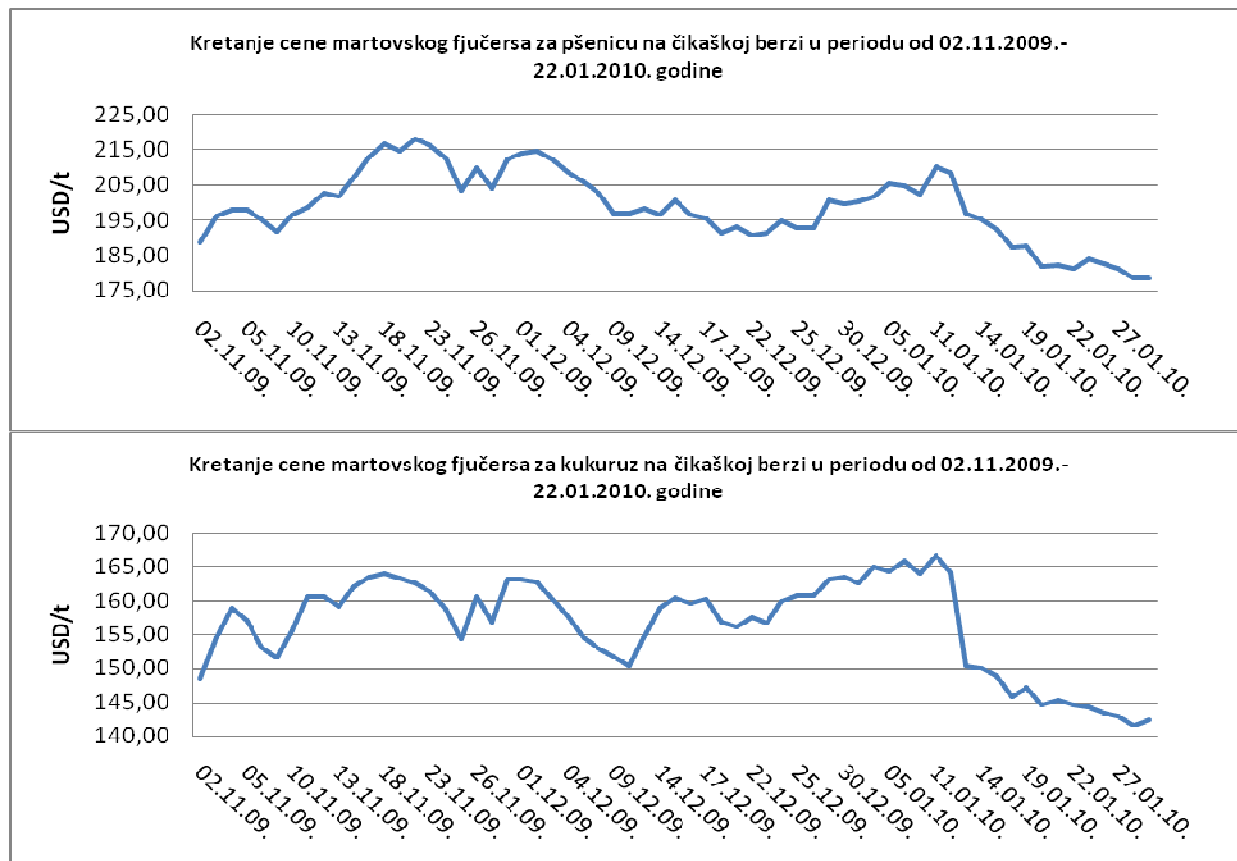

Zbirni pregled i struktura ovonedeljnog prometa, dati su sledećoj tabeli:

roba	ponuđena količina (tona)	cena ponude din/kg sa PDV- om	zaključena količina (tona)	zaključena cena din/kg sa PDV-om
